

Free Workshop on Data Visualization for Environmental Change at the American Center in New Delhi on April 20, 2018

With Dr. Anthony Acciavatti from Columbia University.

Columbia Global Centers | Mumbai and the American Center are organizing a workshop led by Dr. Anthony Acciavatti from Columbia University's Graduate School of Architecture, Planning and Preservation (GSAPP) on data visualization to look at new techniques of imaging water ecologies over time.

This workshop will use open-access satellite imagery and census data to investigate methods and techniques of building environmental data sets from the ground up. The goal of the workshop is to strengthen and sharpen the ways in which we collect and interpret data so as to re-orient how we navigate, inhabit, and define the environment.

About Anthony Acciavatti

Dr. Anthony Acciavatti is Adjunct Assistant Professor, GSAPP, Columbia University. He spent a decade hiking, driving, and boating across the Ganga in order to map the river and authored *Ganges Water Machine: Designing New India's Ancient River*, which was awarded the 2016 John Brinckerhoff Jackson Book Prize.

- **Date:** April 20, 2018
- **Time:** 2pm-5pm
- **Venue:** American Center, 24 Kasturba Gandhi Marg, near Barakhamba Metro Station, New Delhi
